Mobile: +91 9873933785

Engineering Leader driving AI-powered automation and scalable platform solutions for global enterprise clients

PROFILE SUMMARY

- Seasoned Software Engineering Leader with **11+ years** of experience in software & web development, product delivery, and client relationship management
- Strong experience in designing and building **scalable, high-performance systems and API-driven architectures**
- Proven expertise in **AI-driven automation, workflow optimization, and data processing & ETL pipeline development (Python, PySpark)**
- Hands-on experience in **end-to-end product lifecycle**, from requirement analysis to design, development, and deployment
- Skilled in translating business requirements into **scalable, high-impact technical solutions for global clients**
- Proficient in Angular, .NET Core, C#, Python, REST APIs, and modern web technologies
- Strong foundation in **OOPs, SOLID principles, and data structures**

KEY SKILLS

~ AI & Automation (Workflow Automation, Validation Systems, Data Comparison Engines)
~ Data Engineering (ETL Pipelines, PySpark, Data Processing)
~ Backend Development (.NET Core, REST APIs, Microservices Architecture)
~ Frontend Development (Angular, JavaScript, HTML5, CSS3)
~ Cloud & Tools (AWS S3, Snowflake, Git, CI/CD)
~ System Design & Architecture (Scalable Systems, API-first Design)
~ Agile Delivery & Leadership (Team Management, Sprint Planning, Stakeholder Management)

ORGANIZATIONAL EXPERIENCE

At Jivox Softwares India Pvt. Ltd., Bangalore

Feb'18 – Present

Jul'22 – Present: as a *Senior Manager*

Aug'21 – Jun'22: as an *Associate Manager*

Oct'19 – Jul'21: as a *Team Lead*

Feb'18 – Sep'19: as an *Associate Technical Lead*

Role

- Collaborating with cross-functional teams to design and develop **high-performance, resilient solutions** aligned with client requirements
- Reviewing project specifications and designing **scalable, performance-optimized technology solutions**
- Developing high-performance, modular, API-driven systems for high-volume campaign execution and **ETL-based data processing pipelines**
- Built and optimized **ETL workflows for ingesting, transforming, and validating large-scale campaign data from multiple sources**, ensuring data accuracy and timely processing
- Advising business and technical stakeholders on **scalable AdTech solutions and system architecture decisions**
- Driving Agile delivery through **sprint planning, backlog management, and cross-team coordination**
- Managing the **end-to-end product lifecycle**, from feasibility and requirement definition to design, development, QA, and deployment
- Rapid prototyping of POCs and delivering **end-to-end campaign automation solutions**, including UI, feed processing, and recommendation engines

AI & Automation Initiatives

- Designed and implemented AI-driven automation solutions to **reduce manual effort, improve accuracy, and accelerate campaign delivery**
- **PixelProof (AI Validation System)**
Designed and developed an AI-based validation system to detect image-text overlap, formatting issues, and compliance errors
→ Reduced manual QA effort by **~40–60%** and improved campaign turnaround time

- **DiffSense (Data Comparison Engine)**
Built a Python-based data comparison solution to analyze discrepancies and calculate match rates across large datasets
→ Enabled accurate campaign validation and minimized manual reconciliation effort
- **Workflow Automation (n8n + APIs)**
Automated operational workflows including calendar-based responses, Google Sheets-based data pipelines, and API-triggered processes
→ Improved team productivity by reducing repetitive manual tasks
- **Developer Productivity using AI Tools**
Leveraged AI-assisted development tools (e.g., Copilot) for faster code generation, debugging, and prototyping
- **Slack Notification System (Automation Tooling)**
Developed a Slack-integrated notification system using webhooks and Google Sheets for real-time updates and tracking

Major Projects Executed

Clients: Nike, Marriott, Mazda, Claritin, Facebook, YouTube, Bridgestone, Volkswagen, Bose, Dove, MIQ (global enterprise clients)

Technology: .NET Core, C#, Angular 10, Python, PySpark, JavaScript, NodeJS, REST APIs, AWS S3 (including AI-driven automation and data processing workflows)

Team Size: 7–12 members (led cross-functional teams across multiple campaign deliveries)

Description: - Building and enhancing the Jivox EAM (Enterprise Account Management) platform to **automate campaign creation, dynamic ad generation, and performance tracking at scale**
- Developed systems for **dynamic video generation using real-time data inputs (e.g., weather-based APIs)**
- Designed and implemented **ETL pipelines for feed ingestion, transformation, and processing**, enabling efficient campaign data handling and personalization
- Contributed to **AI-driven validation and automation workflows** to reduce manual effort and improve delivery accuracy
- Enabled **high-volume campaign execution for global brands**, ensuring scalability, performance, and reliability

At Ness Technologies India Pvt. Ltd., Bangalore

Feb'17 – Feb'18

Senior Software Developer

Client: ART.COM

Delivered scalable solutions for a global e-commerce platform, ensuring **performance, usability, and data accuracy across regions**

Project Title: Translation Management System (TMS) and Mobile Optimization for multiple domains

Technologies: C#, AngularJS 1.6, SQL Server 2012, JavaScript, jQuery, RWD, CSS3, Gulp

Team Size: 5-6 Members

Description: - Developed a **Translation Management System (TMS)** supporting multi-region and multi-language websites across global domains
- Improved **content localization workflows and system performance** for international users
- Contributed to **responsive UI development and frontend optimization** for better user experience

Project Title: Universal Analytics

Technology: C#, Google Tag Manager (GTM), Clickstream

Team Size: 2 Members

Description: - Implemented **cross-device user tracking and analytics integration** using Google Tag Manager
- Improved visibility into **user behavior and engagement across platforms**

At Accenture Services Pvt. Ltd., Bangalore

Oct'14 – Jan'17

Dec'15 – Jan'17: Software Developer

Client: Accenture CIO

Delivered enterprise-grade applications in a large-scale environment, ensuring **usability, reliability, and maintainability**

Project Title: My Automation Store (MAS)

Role: UI Developer/Front-End Developer

Technology: ASP.NET MVC, Web API Services, AngularJS, HTML5, CSS3, Bootstrap and SQL Server

Team Size: 9-10 Members

Description: - Developed **My Automation Store (MAS)**, an enterprise portal for provisioning internal tools and services
- Built responsive UI and integrated backend services using **ASP.NET MVC, Web APIs, and AngularJS**
- Contributed to **scalable frontend architecture and improved user experience**

Oct'14 – Nov'15: Associate Software Developer

Project Title: Intelligent Tools - SharePoint KX Site and NorthStar Application
Role: SharePoint Developer
Technology: SharePoint 2010 and 2013, ASP.NET, HTML, CSS, jQuery and JavaScript
Team Size: 2 Members
Description: - Developed **enterprise knowledge platforms using SharePoint 2013**, enabling users to discover tools and solutions via use-case-based filtering
- Built and maintained **NorthStar Wiki platform** for structured documentation and user guidance
- Improved **content accessibility and usability across enterprise teams**

EDUCATION

- **B.Tech in Computer Science** – GGSIPU, New Delhi (2014)

IT SKILLS

- Languages: Python, C#, JavaScript, PHP
- Frameworks: .NET Core, ASP.NET MVC, Angular (1.x, 5, 10+)
- Data Tools: PySpark, Jupyter Notebook, Anaconda
- AI & Automation: n8n, Copilot
- Web Technologies: HTML5, CSS3, Bootstrap, LESS
- Libraries & Runtime: NodeJS, ExpressJS, jQuery
- Cloud & Tools: AWS (S3), Git, NPM, Webpack, Gulp
- Databases: MySQL, Snowflake
- Other: REST APIs, Microservices Architecture

AWARDS

- **Above & Beyond Award (3x) – Jivox**
Recognized for exceptional performance and successful execution of complex campaigns (Q3 FY2018, Q2 FY2020, Q2 FY2024)
- **Gold Standard “ACE” Award – Accenture (Q3 FY2016)**
Awarded for delivery excellence and high-quality project execution
